

AVALON TRAVELER BOOM POLE

The first professional boom pole designed to fit into a standard equipment case, the Avalon Traveler has a minimum length of just 20" (50.8 cm), and stores quickly for easy, hassle-free transportation. Fully expanded, this versatile new 6-section pole extends to a reach of 79" (2 meters).

Constructed of lightweight, durable aluminum tubing, the Traveler is ideal for

ENG, EFP, and DV production. The pole's coupling system provides maximum holding power & minimum torque. K-Tek's proprietary "captive collet" ensures jam-resistant coupling. Every unit is fitted with the company's unique pole top featuring cable retaining slots and a replaceable stainless steel threaded mounting stud. Available either in factory wired or U-wire configuration.

Model	Min. Length	Max. Length	Sections	Weight
KE-79	20" (50.8cm)	79" (2m)	6	18.9 oz. (535.8g)
KE-79CC	20"(50.8cm)	79" (2m)	6	23.4 oz. (663.4g)

See price list for specific wired and unwired products
